Glare Control Sports Lighting

Soft™ Lighting Systems' Advantages

- **NO LIGHT POLLUTION** No Up-Light, No Sky Glow, No Light Pollution. Soft™ Lighting Systems provides a low-visual impact; perfect for the surrounding communities and air traffic.
- **NO SPILL LIGHT** Forward Throw technology controls the spill light better than any spherical parabolic luminaire. There are no shields to install on a Soft™ Lighting Systems luminaire. Communities can develop Sports Fields in Residential Areas where they are most convenient.
- **NO GLARE** Forward Throw Luminaires have no off-site glare and minimal on-site glare. Player visibility and comfort level are improved, creating a safe and comfortable playing environment.
- **NO AIMING** Bracket mounted Luminaires give you quicker installation and no re-aiming **EVER**.
- **PERFECT ILLUMINATION** Utilizing 1000-watt metal halide and 1000-watt high-pressure sodium lamps, our forward throw reflector Luminaires evenly distribute the light producing a superior illumination and comfort level. NO shadows or hot spots.
- **PROPER LIGHTING DESIGN** Our Application Engineers have designed *AND MEASURED* over 750 Sports Fields. You can depend on our recommendations. Your Soft™ Sports Lighting System will provide reliable, full level lighting for years.
- **DAYLIGHT APPEARANCE** The combined use of 1000-watt metal halide and 1000-watt high-pressure sodium sources provides an exceptionally comfortable warm white light, similar to incandescent.
- **LONG LIFE LAMPS** Light levels stay high longer with a 1000-watt lamp system. Lamp life is over FOUR times longer than competing 1500 watt systems. We recommend cleaning and relamping once every TEN years.
1500-watt metal halide lamps are available if you prefer.
- **ENERGY CONSCIENCE** A 1000-watt system consumes the same total energy as a 1500-watt system designed to the same illumination level. PLUS you get Better light distribution and Reduced player glare.
- **CONTEMPORARY APPEARANCE** The Soft™ Lighting rectilinear housing has a contemporary design and style for a low-profile appearance. The poles and luminaires blend easily into the surrounding environment.
- **RESULTS** Soft™ Lighting Systems provides the owner a perfectly lighted playing field for the life of the system. We believe the owner deserves the Best Value for his money, and the lowest operating expenses possible.

Soft™ Lighting Systems supports the Illuminating Engineering Society of North America (IESNA) Sports Lighting Recommendations as listed in their publication RP-6

Soft™ Lighting Systems is a member of the International Dark Sky Association.
