Soft™ Lighting Systems offers a “double davit” bracket arm that mounts on a 10.6 meter concrete pole. We use green cement that blends our tennis courts/Sport Court/Basketball courts in with the environment. In the upper left photo a single “double davit” bracket arm is shown, and the upper right photo displays a double “double davit” bracket arm in a 90 degree formation. We also offer a “double davit” bracket arm in a 180 degree formation (not shown).
